1. The preliminary amendment and substitute specification filed Feb. 18, 2005 have been entered.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group 1, claim(s) 28-33, 39-56 and 60, drawn to an electronic component inspection apparatus.

Group 2, claim(s) 34-38 and 57-59, drawn to an electronic component inspection apparatus.

Art Unit: 2856

5. The inventions listed as Groups 1-2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group 1 does not require the special technical feature of having the inspection portion, the component standby portion and the component storage portion arranged along a line within a range of motion of the suction nozzle as required by Group 2 as evidenced by such not being required in base claim 28 of Group 1.

Group 2 does not require the special technical feature of an image capturing device arranged to capture an image of the component that is being transferred by the component transferring device as required by Group 1.

6. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
